

UFARYL DL 85

**Toilet Care | Laundry
Hard Surface Cleaning | I&I**

02/ Jan 2023

Product description

UFARYL® DL 85 is an anionic surfactant based on linear alkyl benzene sulphonate and it is a medium high active basic grade in the UFARYL® product line. The unique product composition is customized to meet efficient dough mixing and low friction extrusion for toilet care applications. The product is commonly used as the main active ingredient in dry mix formulations and it is compatible with all common dyes used. UFARYL® DL 85 has medium solubility properties, which can be easily modified by using additional solubility agents during formulation. Linear alkyl benzene sulphonate is readily biodegradable.

Chemical description: Linear Alkyl Benzene Sulphonate, Sodium salt.

Properties	Typical	Min	Max
Apperance	Ivory white powder		
Bulk Density (g/l)	475	400	550
Active content (w/w %)	85	83	87
pH (1% a.m. solution)	10,7	10,0	11,0
Inorganic salts (w/w %)	Balance	-	-
Water (w/w %)	1,6	0	2,0

Packaging, storage and handling

UFARYL® DL 85 is shipped in 25 kg/18 bags on pallets, 600 kg and 800 kg big bags. UFARYL® DL 85 has a strong hygroscopic character, and will absorb humidity if exposed to open air. Store at room temperature and dry. Stability is minimum 12 months in sealed package at recommended temperature

For further details regarding handling, please see Safety Data sheet.

Application

Markets:

Home Care, Hygiene, Industrial and Institutional cleaning

Market segments:

Hard surface care, Fabric care, Industrial and Institutional cleaning

Typical applications:

Hard surface cleaning, toilet care, rim and in cistern blocks, all purpose liquid detergents, car cleaning, laundry
